New enriched product line

With the aim to establish ourselves more and more as a technical partner capable of finding unique solutions, we have developed important new products to serve this specialist market.

The Marine industry.

The introduction of new colours, the further improvement of our Sitol® polymer and the development of new formulations have led to an important enrichment of the Torggler marine product range.

Addition of two new colours

Sitol® Deck Caulking S

Neutral, sandable silicone sealant
for teak caulking.

White

Grey RAL 7012

Sitol® Primer Glass

For the protective treatment of glazing in PC, PMMA and glass.

Metal container - 0,5 l

■ Black

Sitol® Deck Bonding LV

Low-viscosity hybrid adhesive for gluing natural and synthetic teak decks. Suitable for large surfaces.

Bucket - 2,5 kg

Black ■

Sitol® M.E.D.

High-performance hybrid sealant/adhesive for all types of applications in the marine industry including the installation of mineral and organic glass. Upgrade of Sitol® Marine.

Cartridge - 290 ml
